Bulletin of Bibliography

Vol. 3 OCTOBER, 1903. No. 7

This Bulletin is published, primarily, as a means of communication between The Boston Book Company and its customers. A constant endeavor will be made, however, to include in each issue enough original matter of sufficient value to induce librarians to preserve and bind up the numbers. Each volume will be provided with a title-page and an index.

No subscription price will be put upon the journal, and numbers will not be sold. It will be sent to a selected list of libraries, customers or likely to become customers of The Boston Book Company. The circulation of The Bulletin will be increased in proportion to the interest shown in it, and in the special work of the Library Department of The Boston Book Company. Correspondence is solicited, and should be addressed,

The Boston Book Company,

EDITORIAL COMMENT.

TITLES AND INDEXES TO PERIODICAL VOLUMES.

Our article in the April Bulletin on the subject of "Improper issue of title-pages and indexes of Periodicals" and our list of delinquents have called forth many cordial expressions of approval from libraries all over the country. We have also made a few converts among the periodical publishers, but "Public Libraries" is as yet apparently unconvinced, and thinks we had no motive in this matter other than our own personal "financial interests." The hearty approval of libraries everywhere, and the favorable comment in the report of the A. L. A. Committee on title-pages (p. 164 of the *Niagara Falls Conference Proceedings*) will effectually dispose of that claim. It is evident that our interests and those of libraries are the same. We now give the list of "temporary" periodicals, that is, those not considered worthy of preservation by their publishers, as no titles and indexes whatever are printed. For the most part these are trade journals, though we are sorry to have to include *Harper's Weekly*, *Leslie's*, and such standard periodicals with the rest.

There is a most curious and fallacious argument put forth by the publishers of the big monthlies as to why title and index cannot be included in every number of the edition of a magazine; namely, the extra expense incurred. Yet it can be shown that for magazines like Scribner's, Harper's, Cosmopolitan, Review of Reviews, McClure's, Everybody's, World's Work, and many others, it would be a saving of hundreds of dollars a year to the publishers to include title and index in the whole edition of the completing number of each volume instead of printing up a few and sending them out under stamps to those who ask. This has been figured out in detail in the Publisher's Weekly for June 6, 1903 (p. 1340).

NEW DECISION AFFECTING DUTY-FREE BOOKS FOR LIBRARIES.

By a new decision of the Treasury Department (July, 1903), Libraries desiring to save payment of duty on books imported will be required to furnish both the usual declaration in advance of entry (that the specified books are to be imported for them and that they will not take similar books from the dealer's stock in hand) and also a *receipt for the books* showing that they have been delivered within ninety days of entry, and further stating that these books "were not taken from a stock on hand in the country," and giving not only date of their receipt, but the custom-house entry number and date. How any librarian can sign such a document we fail to see. He knows nothing more than that he has received copies of the books ordered. How can he say that they were not from stock, or give the date and number of the customs entry, unless indeed he has supernatural powers of vision?

The dealer has sworn in advance that he is importing certain books and agrees not to supply any from stock on hand. The Boston Book Company, importing heavy scientific sets for libraries, has often held them more than ninety days awaiting the making good of imperfections discovered on collation. Now, they will be obliged to ship such sets imperfect, or charge the library the 25% duty. Or will their customers be willing to sign a paper stating that what is still in Boston has been received? They can perhaps as well do this, as say that they are sure the books received are the ones imported for them. Of what use except to increase the already exhaustive details of importing can this new requirement be? We hope every librarian who does any importing will enter a protest at Washington, and send The Bulletin of Bibliography a copy.

COMMUNICATION.

HOW TO SAVE ALL THE TROUBLE OF HUNTING FOR LOST NUMBERS OF MAGAZINES AND THE EXPENSE OF BINDING THEM.

(Elaborated from the editorial in *Public Libraries*, page 272, 2d column, line 36 to end of page, June, 1903.)

ATTACH all the *interesting* nos. of a magazine — which people are likely to carry away, to the *uninteresting* ones (which the public won't touch?). Then when a volume is completed you will have it at hand all together, or you won't have any odd numbers to bother to fill up. Thus the volume is either bound in advance, or you have nothing to bind, and are therefore in either case saved the binder's bills.

To Libraries adopting the above plan the Boston Book Co. will doubtless be glad to furnish, as fast as needed, complete sets of *Public Libraries*, and all other *interesting* magazines to replace those carried away in bulk by readers. Yet it would seem that in advocating this plan *Public Libraries* is influenced by its own "financial interest" — a desire continually to sell complete volumes of itself to each subscriber.

"CONSTANT READER."

Small, H. Beaumont. Botany of Bermuda. [Hamilton, Bermuda, 1900.] 16°. 56 pp. and cover-title.

NOTE.—In the prefatory letter, donating the work to the Bermuda Board of Agriculture, the author says: "It contains the results of two years observations, and is, I think, as accurate as a work of this nature can be. I have avoided as far as possible the use of botanical terms, so as to make it comprehensible to every reader." After first attempting to account for the origin of vegetable life on isolated islands he records the plants of the island under the following headings: *Indigenous, Semi-Indigenous, Weeds, Escapes*, and *Specially Imported Trees and Plants*. A list of 48 indigenous plants, besides grasses and ferns, is given on p. 7-8. This list is amplified on p. 11-21. Semi-indigenous plants to the number of 42 are given on p. 8-9 and amplified on p. 21-28. Weeds are similarly treated on p. 9-10 and 28-32; Escapes, p. 10 and p. 32-36; Plants specially introduced, p. 10-11 and p. 36-46. Ferns, with names and habitat, 27 species, p. 46-48. Medicinal plants, p. 51-53. Water plants, p. 53-56. Plants as a rule are entered under their popular, followed by their botanical names. The descriptions are popular rather than scientific in their character.

NOTE.— One of the earliest, if not the earliest attempt to scientifically determine the latitude and longitude of Bermuda, was made during this voyage.

"La relation de ce voyage a été publiée à Londres en 1834 par M. Webster, chirurgien du bâtiment."—p. 77.

"Les observations du pendule qui avaient été faites pendant cette expedition furent soumises après la retour du bâtiment, à l'examen de M. Fr. Baily, président de la Société astronomique de Londres, et la rapport de ce savant forme le 7e volume des mémoires de cette Société."—p. 77, 78.

NOTE.— The information concerning the Bermudas appears on page 307. "Sa faune paraît cependant tenir encore de celle des Açores et des Canaries, autant au moins qu'on en peut juger par le peu de renseignements qui ont été recueillés sur les Arachindes des Bermudes. . . . C'est encore à J. Blackwell que nous devons ces renseignements. L'auteur ne mentionne que six espèces: *Loxosceles rufescens* L. Duf. (sous le nom de *Scytodes pallida*); —*Epeira gracilipes* Blackw.; — *Xysticus* (?) *pallidus* Blackw. (sub *Thomisus*); — *Heteropoda venatoria* L. (sous le nom de *Olios antillanus* Walck.), espèce répandue dans les régions intertropicales du monde entier; — *Salticus diversus* Bl., Attide de genre incertain; — enfin *Filistata depressa* C., Koch, espèce américaine probablement synonyme de *F. capitata* Hentz.

"Nous avons vu dans les collections du Musée de Cambridge (États-Unis) un *Euscorpius carpathicus* L. identiquement semblable au type d' Europe, étiqueté, peut-être par suite d'une erreur, comme venant des Bermudes."—p. 307.

In the "Liste Générale" appear the following species from Bermuda:

Spectator, The. London. folio.

LANDSCAPE and literature. Vol. — (no. 3651, June 18, 1898), p. 855-856.

NOTE.— "Shakspere, Sir A. Geikie truly reminds us, introduced the Warwickshire landscape freely into his plays, so that in Bohemia, for instance, we feel that we are still watching Midland rustics amid familiar scenes in the 'bright Stratford meadows.' But whence came the vision of the enchanted island in *The Tempest?* It had no existence in Shakspere's actual world, but was woven out of 'such stuff as dreams are made of.'"—p. 355.

KIPLING, Rudyard. Landscape and literature. [To the Editor of the "Spectator."] Vol. — (no. 3653, July 2, 1898), p. 15-16.

NOTE.— A reply to the question quoted above. "May I cite Malone's suggestion connecting the play [*The Tempest*] with the casting away of Sir George Somers on the island of Bermuda in 1609; and further may I be allowed to say how it seems to me possible that the vision was woven from the most prosaic material,— from nothing more promising, in fact, than the chatter of a half-tipsy sailor at a theatre?" The writer then goes on to show how the shipwrecked sailor may have narrated his story to a stage-manager. "Much, doubtless, he discarded, but so closely did he keep to his original informations that those who go to-day to a certain beach some two miles from Hamilton will find the stage set for Act II. Scene 2 of *The Tempest*,— a bare beach, with the wind singing through the scrub at the land's edge, a gap in the reefs wide enough for the passage of Stephano's butt of sack, and (these eyes have seen it) a cave in the coral within easy reach of the tide, whereto such a butt might be conveniently rolled ('My cellar is in a rock by the seaside where my wine is hid'). There is no other cave for some two miles. 'Here's neither bush nor shrub'; one is exposed to the wrath of 'yond same black cloud,' and here the currents strand wreckage. It was so well done that, after three hundred years, a stray tripper, and no Shakespeare scholar, recognized in a flash that old first set of all."—p. 15.

TAYLOR, John, *The Water-Poet.* Works; Comprised in the Folio Edition of 1630. Vols. 2-4 (1869).

NOTE.— In volume 2, p. 58-59, 63 (bottom paging 218-219, 223), appears: Odcombs Complaint; or, Coriats Funerall Epicedium: or Death-Song, vpon his latereported drowning. With his Epitaph in the Barmuda, *and* Vtopian *tongues:* And tranſlated into Engliſh by IOHN TAYLOR.

At the foot of the second column of p. 61 (221) is: "EPITAPH in the *Barmooda* tongue, which muſt be pronounced *with the accent of the grunting* of a hogge." This consists of six lines of unreadable matter, printed in gothic type, each word ending with the letters "ogh." On the next page, after the "Epitaph in the Vtopian tongue," follows: "The ſame in Engliſh tranſlated by Caleb Quiſhquaſh, *an Vtopian borne* and principall Secretary to the great *Adelontado of Barmoodoes.*

"Here lies the wonder of the Engliſh Nation,
Inuolu'd in *Neptunes* briniſh vaſty maw:
For fruitleſſe trauell, and for ſtrange relation,
He paſt and repaſt all that e'r eye ſaw.
Odcomb produc'd him; many Nations fed him.
And worlds of Writers, through the world haue ſpred him."

Facsimiles of the engraved and printed title-pages of the original edition follow that of the reprint. The catalogue of the British Museum contains the title followed by the imprint: "Printed for merrie recreation, and are to be sold at the salutation in Vtopia: [London,] 1613. 8°."
